WORK IN PROGRESS

[1] **Effects of Expanding Unemployment Insurance on Well-Being: Responses to COVID-19.** Joint with M. Bitler, D. Horn, and A. Seifoddini (R&R at JPAM)

We leverage the variation across states in the timing of the adoption of several unemployment insurance programs introduced by the CARES Act to identify the impact of unemployment insurance benefits on food security and mental health. We find that the initial payments for these UI programs had positive effects for some subgroups, particularly for Hispanic individuals and for women.
